

# SCHARMÜLLER EMERGENCY RELEASE SYSTEM

**CONNECTED WITH RELIABILITY**

**scharmüller**   
ANHÄNGERKUPPLUNGEN

## ATTENTION FIRE HAZARD!

The temperatures rise, the fields are harvested and again and again you hear a baler is going up in flames.

Quite often, it is just a simple stone hitting on metal and setting the baler on fire, which also can spread easily to the tractor.

## THE SOLUTION! SCHARMÜLLER'S **EMERGENCY** RELEASE SYSTEM

The emergency button – pressed once, protected thousand times. The emergency release is activated hydraulically, and in case of fire, the driver can disconnect the mechanical connection to the baler. The patented construction ensures safe operation even after years of non-use.

## YOUR ADVANTAGES

- » **DRAWBAR** IS DELIVERED COMPLETE INCLUDING TECHNOLOGY
- » **EASY INSTALLATION** (ABOUT 3-4 HOURS)
- » **CONNECTION TO HYDRAULICS** AND COMPRESSED AIR SUPPLY LINES
- » **OPTIONAL PARKING POSITION** FOR PTO-SHAFT
- » FOR ALL COMMON **TOWING EYES**
